Changes to DELWP's Property Reports

You are receiving this message because your organisation is consuming a service that will be decommissioned in March 2022.

What's happening?

Land Channel and its Property Reports have been migrated to the new MapShare Platform because Land Channel is built on legacy technology and software which are no longer supported.

We have also migrated our services to the AWS Cloud to enhance our service delivery capabilities.

When is this happening?

To continue to access the Property Reports provided by DELWP, you will need to migrate your services to MapShare **by 14 April 2022**.

Impact on you:

You will need to update your systems by 14 April 2022 as per the following instructions.

How to migrate to the new service

Please send all queries and final confirmation of completion to our support desk at gis.helpdesk@delwp.vic.gov.au, include "**Migrating to the new DELWP Property Reports [organisation name]**" as the title of your email request.

We will then send you a PDF containing the instructions required to complete your transition. Please also send us confirmation via the GIS Helpdesk if you do wish to migrate to the new service.

Kind regards,

GIS Help Desk | Enterprise Spatial Support | Information Services Division
Corporate Services | Department of Environment, Land, Water and Planning
